# ACCOMPLISHMENT

**CAPSTONE PROJECT**        **2023-2024**

- Utilized my foundational knowledge of machine learning and Java programming and Firebase Realtime Datebase to develop an application using Android Studio.
- Designed an application for development to ensure adherence to the project's design specifications.
- Conducted manual testing and implemented Extreme Programming (XP) practices from the Software Development Life Cycle (SDLC) to ensure smooth deployment and maintain the quality of the testing process.

**EUNIVATE (FREELANCE)**      **APRIL 2024 -NOV 2024**

- Utilized React.js with Vite as the framework, along with Express.js, Tailwind CSS, and MongoDB as the database, to develop a fully responsive website.
- Applied foundational knowledge in implementing APIs and utilizing libraries to create a responsive application.
- Conducted manual testing on the responsive website to identify and address bugs, ensuring the resolution of errors in both the backend and frontend, as well as within the database.
